Package Name: 5 Bell Peppers - Capsicum - Low Poly Realistic Vegetable Stylized Pack
Published By: Ethereal Grace

Description:

- This exquisite 3D model featuring Five Various Color Bell Peppers, also known as Capsicum.
- This low-poly model captures the essence of these popular vegetables, showcasing their rich and diverse colors: Red, Orange, Yellow, Green, and Purple.
- Each bell pepper in this collection is meticulously crafted to highlight its unique color and shape, offering a realistic yet stylized representation perfect for a variety of digital applications
- Scaled with realistic standards: 1 Unit = 1 Meter = 1 Unity Cube.

Technical Parameters:

- **Geometry Triangles** 11.3k (11322)
- **Vertices** 5.7k (5725)
- **PBR** No
- **Textures** 1 (PNG: 192x192)
- **Materials** 1
- **UV Layers** Yes
- **Vertex Colors** No
- **Animations** 0
- **Rigged geometries** No
- **Morph geometries** 0
- **Scale transformations** No

Important Notes (Fix Pink Materials for URP and HDRP):

This package includes an **AutoSwitchMaterialShader** script that detects the active render pipeline (HDRP, URP, or Built-in) and automatically switches the materials to the appropriate **SpeedTree8 shader** without manual adjustments.

- **For URP (Image 1)**: Automatically switches to the Universal Render Pipeline ➤ Nature ➤ SpeedTree8 shader and enables **Two-Sided = Yes**.
- **For HDRP (Image 2)**: Automatically switches to the HDRP ➤ Nature ➤ SpeedTree8 shader and enables **Double-Sided = Checked**.
- **For Built-in Pipeline (Image 3)**: Automatically ensures **Two-Sided** rendering is enabled via the internal shader setting.

Once the package is imported, all **SpeedTree8 materials** in the **Materials** folder are correctly configured for the active render pipeline, no manual changes required.

Manual Fix: **Tools → Auto Fix Material (EG)**
